

Ertuğ Tetik

Software Developer

✉ ertug.tetik@gmail.com ☎ +90 (534) 478 55 97 📍 İstanbul, Kartal 🔗 linkedin.com/in/ertug-tetik

Software Developer with 2+ years of experience in system-oriented problem solving. Currently developing a multiplayer hex-based turn-based strategy game in Unity, focusing on clean architecture, procedural generation, and multiplayer synchronization. Passionate about systemic design, game mechanics, and scalable software architecture.

Education

Boğaziçi University, Management Information Systems

2017 – 2023

Skills

Game Development: Unity, C#, Client-host synchronizations, Multiplayer architecture, ScriptableObject-based data-driven design, State management, Git, Github, VS Code,

Others: SAP, ABAP, Kotlin, Android Studio, SQL

Projects

Medieval Chess (Currently Working On), Multiplayer Turn-Based Strategy Game | Unity | PC

- Designed and implemented a hex-based procedural map generation system.
- Developed a multiplayer architecture using host-client local instances.
- Built a rotation-based facing system affecting combat outcomes.
- Implemented terrain-based stat modifiers (buff/debuff system).
- Designed and coded a dice-based combat resolution formula.
- Created a drag-and-drop unit deployment system.
- Built a data-driven unit system using ScriptableObjects.
- Implemented turn state management and action validation logic.
- Designed UI interactions (hover tooltips, minimal UX philosophy).

Professional Experience

Bis Danışmanlık, SAP/ABAP Developer

01/2023 – 04/2025

- Developed and modified numerous programs based on requests from leading companies in Turkey.
- Resolved various performance issues in existing programs, primarily caused by outdated systems.
- Implemented enhancements using Web Dynpro applications to allow the approval process for purchase requests and orders to be conducted through a web browser, enabling progress on the approval process via different devices, including mobile devices, without direct SAP access.
- Took part in a large export process project, developing the entire workflow from quotation to export file creation without relying on standard SAP programs. Continued to deliver enhancements based on evolving business needs after go-live.
- Developed a security method for programs with URL-based document access, encrypting document and user parameters.

Sika AG Türkiye, Internship

2021

Pitched and executed ideas on how to improve performance and efficiency by automating some tasks through software development such as Excel macros.

Turkcell, Internship

2019

Answered calls, responded to emails, spoke with international business partners and performed routine testing tasks for network processes.

Languages

Turkish: Native • English: Advanced
