

Ertuğ Tetik

Software Developer | Unity Gameplay Systems

✉ ertug.tetik@gmail.com ☎ +90 (534) 478 55 97 📍 İstanbul, Kartal 🔗 LinkedIn 📄 Project Page

Software Developer with 2+ years of enterprise experience and a strong focus on systems architecture. Currently developing a multiplayer hex-based turn-based strategy prototype in Unity, implementing procedural generation, state-driven turn management, and host-client synchronization. Passionate about systemic gameplay design and scalable software engineering.

EDUCATION

Boğaziçi University, Management Information Systems

2017 – 2023

SKILLS

Gameplay & Systems Development (Primary)

Unity (C#), Turn-Based Systems, Multiplayer Architecture (Host-Client), Procedural Generation, Data-Driven Design (ScriptableObjects), State Management

Enterprise Software (Professional Background)

SAP ABAP, SQL, SAP System Integration

PROJECTS

Medieval Chess (Multiplayer Strategy Prototype), Multiplayer Turn-Based Strategy Game | Unity | PC

- Designed and implemented a hex-based procedural map generation system.
- Designed and implemented a local host-client multiplayer architecture for synchronized turn-based gameplay.
- Designed a terrain-aware combat modifier system influencing unit attack and defense calculations.
- Designed and coded a dice-based combat resolution formula.
- Built a data-driven unit system using ScriptableObjects.
- Implemented turn state management and action validation logic.
- Implemented a drag-and-drop unit deployment system integrated with turn-state validation logic.

PROFESSIONAL EXPERIENCE

Bis Danışmanlık, SAP/ABAP Developer

01/2023 – 04/2025

- Developed and optimized enterprise-level SAP programs for large-scale corporate clients.
- Implemented enhancements using Web Dynpro applications to allow the approval process for purchase requests and orders to be conducted through a web browser, enabling progress on the approval process via different devices, including mobile devices, without direct SAP access.
- Took part in a large export process project, developing the entire workflow from quotation to export file creation without relying on standard SAP programs. Continued to deliver enhancements based on evolving business needs after go-live.

Sika AG Türkiye, Internship

2021

Pitched and executed ideas on how to improve performance and efficiency by automating some tasks through software development such as Excel macros.

Turkcell, Internship

2019

Answered calls, responded to emails, spoke with international business partners and performed routine testing tasks for network processes.
