PROFILE

Software developer with experience in backend development, enterprise software and multiplayer game development. Currently working with C#, .NET and SAP ABAP, with hands-on experience building REST APIs, CRM systems and multiplayer game mechanics. Interested in developing practical software solutions for businesses, especially CRM systems, automation tools and scalable backend services.

EDUCATION

Boğaziçi University, Management Information Systems

2017 – 2022

SKILLS

Languages

- C#
- ABAP
- JavaScript
- SQL

Frameworks & Technologies

- .NET / ASP.NET Core
- Entity Framework Core
- REST API Development
- PostgreSQL
- Unity Game Engine
- Firebase
- Docker (containerized deployment)

Tools

- Git
- Visual Studio
- Unity Editor
- Postman

PROFESSIONAL EXPERIENCE

SAP ABAP Developer, Bis Danışmanlık

01/2023 – 04/2025

- Designed and implemented a security mechanism for URL-based document access, encrypting document and user parameters.
- Developed and maintained custom ABAP programs for enterprise clients across multiple SAP modules.
- Identified and resolved performance bottlenecks in legacy ABAP programs.
- Implemented enhancements using Web Dynpro applications to allow the approval process for purchase requests and orders to be conducted through a web browser, enabling progress on the approval process via different devices, including mobile devices, without direct SAP access.
- Took part in a large export process project, developing the entire workflow from quotation to export file creation without relying on standard SAP programs. Continued to deliver enhancements based on evolving business needs after go-live.

Sika AG Türkiye, Internship

2021

Pitched and executed ideas on how to improve performance and efficiency by automating some tasks through software development such as Excel macros.

Turkcell, Internship

2019

Answered calls, responded to emails, spoke with international business partners and performed routine testing tasks for network processes.

PROJECTS

CRM System with WhatsApp Integration, Developed a lightweight CRM system designed for small businesses.

- Lead management system
- Contact and opportunity tracking
- REST API built with **ASP.NET Core**
- PostgreSQL database
- Entity Framework Core data layer
- Multi-tenant ready architecture
- Interactive API documentation via Swagger
- Planned **WhatsApp Web integration** for automated message tracking
- Dockerized deployment
- Cloud deployment on Render
- PostgreSQL hosted on Neon

Live demo: ertugtetik.github.io/mycrm.html 🌐

Medieval Chess – Multiplayer Strategy Game, Turn-based strategy game inspired by chess but played on hexagonal maps with medieval units.

- Hex grid procedural map system
- Multiple unit types (infantry, cavalry, archers)
- Terrain-based bonuses
- Turn-based multiplayer system
- Countdown-based turn timer
- Unity Netcode multiplayer synchronization
